THE shaft being sunk at Petroleum Center seven by seventeen feet to the depth of one hundred feet, is actively progressing. It is put down twenty feet in the last seven days.

BRIDGE AT OIL CITY.—The bridge across the Allegheny river at Oil City is to be a suspension bridge, of two spans of 425 feet each, and one semi span of 162½ feet the latter on the Oil City side. The platform will be thirty feet above the level of the river. It will contain a double track for horses, carriages, and sidewalks between the [illegible] feet higher than the track. [illegible] two in number, and the [illegible] to them by iron suspension rods.

MASON BROTHERS, New York, announce for press, to be ready September 1st, a new collection of Church Music for Choirs, Singing Schools, Conventions, &c, to be entitled the "Harp of Zion." It is by two new authors—Solon Wheeler and Frederic S Davenport—well known to the public as persons who have had great experience in such matters, and whose judgment is usually at fault; expressing great confidence that it will prove a popular and rally attractive. An important feature will be the presentation of a number of compositions from distinguished foreign authors as Neukomm, Novello, and others as well as from American worthies, among whom Chas Zeuner is fully represented,—all of which are now first issued from the original manuscripts. Retail price $1 50. The publisher will forward a copy of this book to any teacher or choir leader, post paid, for one half the retail price.

PLUMER AND OIL CITY RAILROAD.—The Plumer Oil and Mineral Company are constructing a railroad between Oil City and Plumer. It is expected that this road will be in running order in a few months. This enterprise, if completed, will be of incalculable value to our order of [illegible]. In the meantime, active preparations are going on to complete the railroad from this city to Pithole.

THERE were extensive freshets during the last of the Rail on river, in New Jersey, on Sunday and in the Schuylkill, at Philadelphia. Railway bridges were carried away, freight trains smashed up, and a great amount of damage done.

Oil Items.

A new well has been struck at Tidioute on Dennis Run, which is now pumping sixty barrels per day, with a good prospect of steadily increasing.

The McNeil well, on the [illegible] farm, is flowing fifty barrels per day. The well is only 242 feet deep. The territory is owned by the Warren and Tidioute Oil Company, and is located about a half mile from Tidioute.

The Baker well, near Tidioute, has a splendid show of oil at the depth of 60 feet.

The Dennis well, on the banks of the Allegheny river, now being drilled, has a splendid show of oil. The well is now 180 feet deep, and from present indications, there is not a doubt but that it will prove a paying institution.

A large number of new wells are being put down on the bluffs, and the excitement in the vicinity of Tidioute is being revived with new vigor. Wells that had been abandoned for years are being drilled deeper, with every indication of final success.

Speculators are turning their attention somewhat to the development of East Oil and Pine Creeks. A number of wells are going down on this stream, and large tracts are being bought up for miles above Enterprise. This territory is not held by the owners at the extravagant prices of land in the vicinity of Oil Creek, Cherry Run and Pithole. The geological formation is the same as that on Pithole, and there is no doubt as the development proceeds that capitalists who have invested in this locality will reap a rich reward.

Mr. Charles Hyde and Dr Egbert began to develop their farm of forty acres in Venango in the beginning of 1861. Their success may be understood by a careful perusal of the following list of paying wells, many of which they hold in their own hands and in all of which they own their land interest, namely one half:

Graff & Hassan Well began flowing July 1861, 800 barrels per day.

Maple Shade Well began flowing August, 1861, 800 barrels per day.

Keystone No 1 Well began flowing September, 1863, 40 barrels per day.

Keystone No 2 Well began flowing October 1863, 60 barrels a day.

Yankee Well began flowing October, 1863, 60 barrels per day.

Turtle Well began flowing October, 1863, 60 barrels per day.

Eagle Well began flowing October, 1863, 60 barrels per day.

Keystone No 3 began flowing November, 1863, 100 barrels per day.

Rhinoceros began flowing December, 1863, 60 barrels per day.

Eagle No 2 began flowing February, 1864, 40 barrels per day.

Porcupine began flowing February, 1864, 25 barrels per day.

Keppler began flowing June, 1864, 100 barrels per day.

Sunny began flowing June, 1864, 200 barrels per day.

Olive Branch began flowing October, 1864, 40 barrels per day.

Keystone No. 4 began flowing November, 1864, 60 barrels per day.

Coquette began flowing November, 1864, 800 barrels per day.
